The cry raised by the Press that the poltical sceptre in New York had been taken from Coukling's hands, by the late affair at Narrazansett Pier, was all bosh. That only served to increase his notoriety, and give him more prominence as a Presidential candidate. Of course his chances for the nomination are not good now, but they have been improved rather than lessened by all of the talk about him in the papers. The nomination of Cornell in New York is considered unwise by the Republicans, as he is a man of little reputation, and was nominated by Conkling, and not by reason of his own popularity. Conkling is still, and is destined to continue, the head and shoulders of his party in the East.

Lowry, who works with McConnell and the boys were there by themselves. Before with they was away from home, and the boys were there by themselves. Before he left, Lowry, hid his pistol. The Cantrell boy, however, got it, and in some way or other managed to kill McConnell, shooting him in the mouth and the ball coming out at the back of the head. When found he was sitting in an arm chair, stonedead, with powder stains, burne, etc, about his month, indicating that the muzzle of the pristol was found an hour or so after the whoting. Young Cantrill left, it seems, as soon as the shooting was done, and was found Suaday morning at three o'clock at an uncles's some five or six miles away, to whose tamily he had said naught about the shooting it will be equal to the best. The cut above illustrates a Grain Drill which we think will meet the want of the grain producers of the South and West, and prove to be what they have so long been waiting for, viz: A strong, simple, effective drill, that does ot require skilled labor to manage, or a machinest to be on hand with his tools ready to repair, or a practical engineer to explain its complicated ma-chinery, and show how it is to be operated. This Drill will work in lands where other drills will fail. It can be easily managed by any one capable of driving a pair of horses or mules, and is eminently adapted to corn lands and lands with a heavy growth of weeds turned under.

Not a cog-wheel, not a belt, no complication, no bother, no breaking of pins and putting in new ones, no stopping to clean out trash, weeds, stalks, sods, clumps, stones and roots.
